transcription factor	microtubules	antimicrobial resistance	microbiome	riboswitch
secretion	taste buds	single molecule fluorescence in situ hybridization (smFISH)	E. coli	sensitivity analysis
"preliminary data" / "preliminary results"	transcription stalling	FREE SPACE 	nuclear pore	olfactory
autophagy	planaria	Waddington's landscape	CITE-seq	cryoEM
nanoparticles	Danio rerio	temperature sensing	$p > 0.05$	"architecture"
